

# **AI, Blockchain, and future technologies: the good, the bad and the ugly of tech disruption in healthcare**

**Lina Daouk-Öyry, PhD**

Asst. Professor of Organizational Behavior – Olayan School of Business

Director of the Evidence-based Healthcare Management Unit (EHMU) – AUB  
and AUBMC

# Critical Look at Competency Modeling

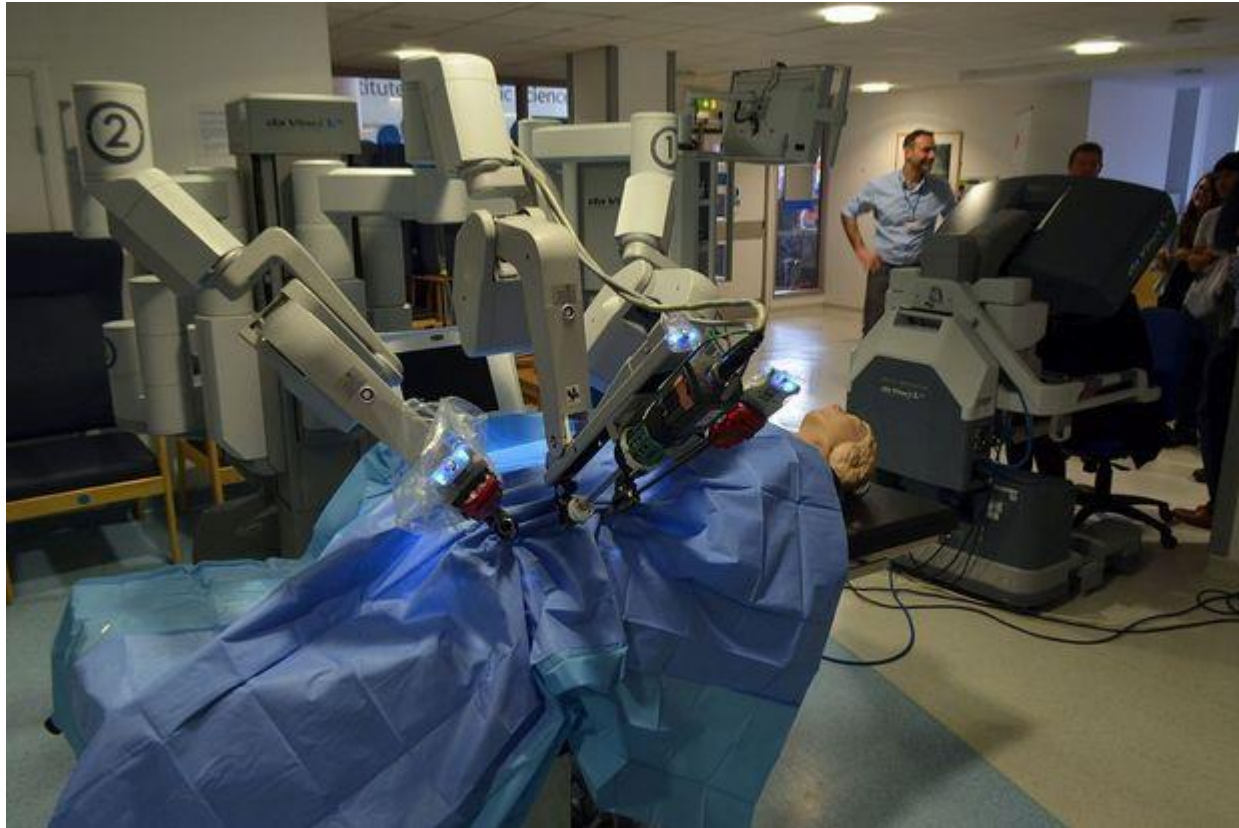

# The Past

# The Present

# The Doctor Will See you now

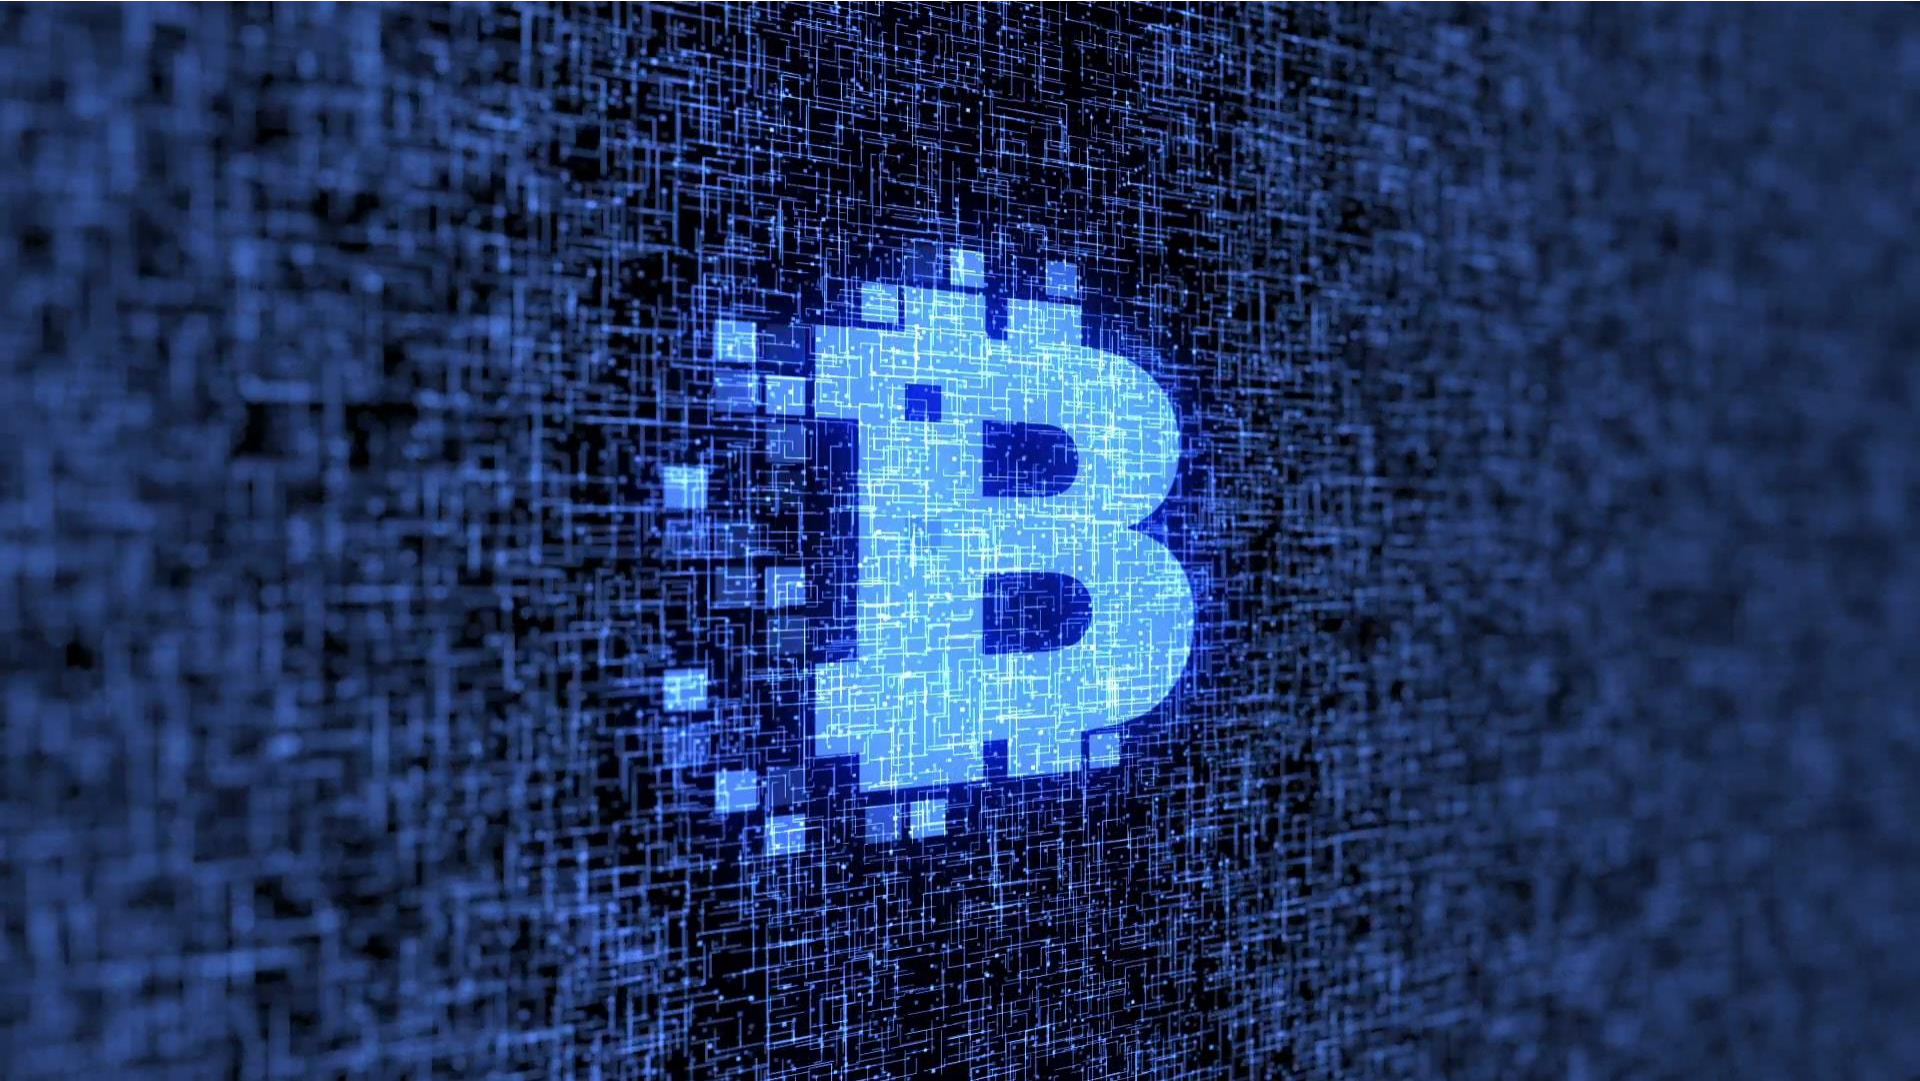

# Early Signs of Tech Disruption

# Mobile Apps in Medical Market

# **Continuously Reimagining Healthcare Delivery**

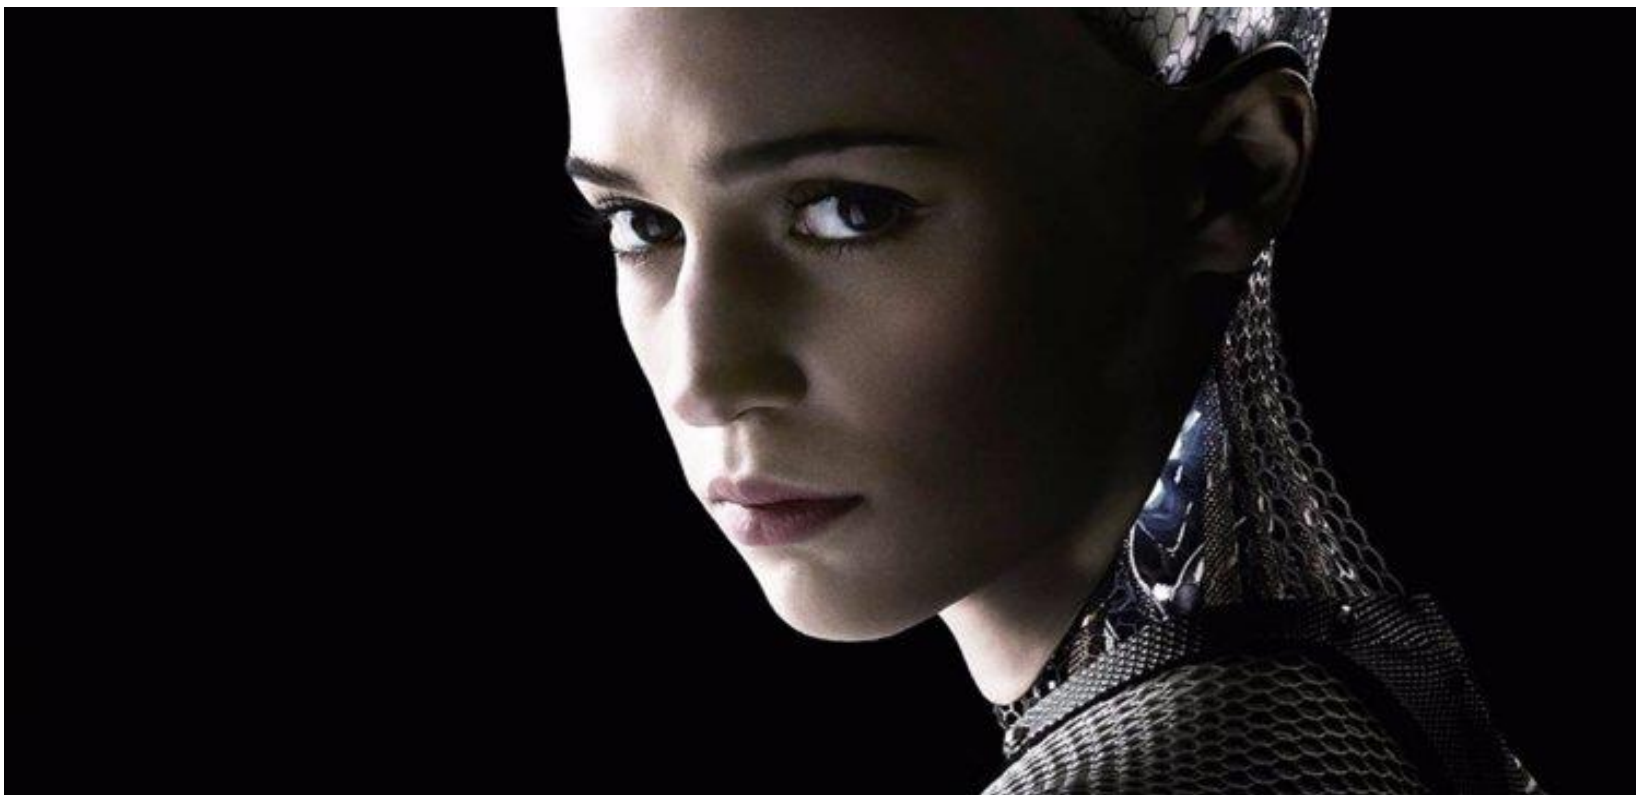

# The Good

Saving more lives

Shifting paradigms from reactively dealing with sickness to proactively monitoring health

# The Bad

# The Ugly?

How soon will emotions be replicated non?

Are we going to be able to anticipate those future skills accurately and properly prepare the next generation of physicians for the future healthcare industry they will be part of?

# The Future

So the future is really about cooperation not competition between humans and AI.

It's about complementarity of skills.

**CS/Eng/IT skills**

**Self-directed learning skills (a la EBMnt).**

**EI, Interpersonal Skills, and intercultural skills**

**THANK YOU**
